## **YouSendIt Plug-in Allows Microsoft Outlook Users and IT Professionals to Seamlessly Send Large Files Directly From Microsoft Outlook**

*YouSendIt works with Microsoft to deliver new technology to simplify sending large files*

**ORLANDO –June 10, 2008** – YouSendIt, Inc., the trusted global leader in digital content delivery, expanded its service offerings with the release of a plug-in for Microsoft Office Outlook. The tool allows users to quickly and seamlessly send files as large as 2 gigabytes directly from Outlook, with YouSendIt providing full file transfer management to ensure secure delivery.

Available for all versions of Outlook, the YouSendIt plug-in supports Microsoft's roadmap for delivering solutions to meet the evolving challenges of IT professionals. The plug-in gives IT professionals and business users a system for managing large file transfers and collaboration without changing the way they attach files. Embedding YouSendIt within Outlook eliminates the need for IT professionals to struggle with developing FTP sites, for users to burn large files to a CD to send via overnight courier, or encounter e-mail bounce-backs from attachments that are too large for recipient networks.

The YouSendIt plug-in for Outlook offers several rich sending options, including:

- *File expiration control* – Users can configure the amount of time a file is available for download or the number of times it is downloaded
- *Password protection, certified delivery, return receipt* – Advanced tracking and security features ensure that only the intended recipient can download a file
- *Usage conditions* – Allows users the option of automatically sending files of a certain size through YouSendIt
- *Zippping* – Allows users to drag and drop folders that will automatically Zip before sending
- *Resumable upload* – Should an Internet connection be momentarily lost during file upload, or if Outlook is closed, upload will resume automatically once the connection has been restored

“The YouSendIt plug-in is a natural complement to Office Outlook. It allows users to share large files easily and eliminates the hassles IT professionals face as a result of e-mail boxes exceeding their capacity,” said Chris Bryant, Group Product Manager for Office at Microsoft Corp. “It’s an exciting tool that empowers people to improve their productivity and collaborate more efficiently, objectives that Microsoft and YouSendIt share passionately.”

“The YouSendIt plug-in for Outlook is a key element of our strategic relationship with Microsoft and directly addresses some of the pain points IT professionals experience every day,” said YouSendIt CEO, Ivan Koon. “This is an example of a bigger framework we are building for all business environments, making YouSendIt the most accessible tool for managing large file transfers within the daily operating environment of business professionals.”

The plug-in, which can be conveniently downloaded directly from the YouSendIt Web site, is the latest module to speed the delivery of large files. The YouSendIt plug-in for Outlook can be downloaded here: <http://www.yousendit.com/cms/plugin-outlook>.
