FOR IMMEDIATE RELEASE

YOUSENDIT SURPASSES THREE MILLION REGISTERED USERS

Company Has Tripled Registered Users and Doubled Paid Subscribers During the Past Quarter

MOUNTAIN VIEW, Calif., [PRNewswire] – Dec 6, 2006. YouSendIt, Inc., the leader in file delivery for business, today announced that it has surpassed three million registered users. This represents 300% user growth since September of this year. The company has also experienced over 200% growth in paid subscribers during the same period.

“The uptake in usage of our new features indicates that business users trust YouSendIt to deliver high value, critical files,” said Ivan Koon, CEO of YouSendIt. “Professional users are increasingly taking advantage of features such as password protection, and branded communications. We will continue to introduce easy to use business features every month throughout 2007.”

Small and medium sized businesses often have limited resources for setting up and maintaining their own file transfer protocol (FTP) sites. They also experience significant frustration and inefficiency with email attachments. According to a survey of 2,000 YouSendIt customers, 80% of small and medium sized businesses have experienced problems with email attachments, 68% have had emails bounce due to attachment size limits, and 68% of business users have burned and shipped CDs and DVDs because files were too big to send via email. YouSendIt solves these critical file delivery issues by providing enterprise-class file transfer Software as a Service (SaaS) solutions that are as easy to use as email.

Knowledge workers and professionals in the creative services industry rely on YouSendIt to deliver large and often time-critical files around the world. YouSendIt currently serves professional photographers and videographers, ad agencies, web design firms, audio and video production studios, design consultants, digital printers and many more professionals that need to send and receive large files.

“We experience consistent flawless delivery of large files using YouSendIt,” said Karen Hebert, President, the Oya Group, a full service marketing agency based in Los Gatos, California. “We currently use YouSendIt to enable customers and contractors to painlessly send large files, and we plan to upgrade to create a branded drop box to communicate with customers.”

“We are so pleased with the results that we are rolling out new marketing programs with YouSendIt as an integral piece of our promotions,” said Bryn Boughton, Chief Marketing Officer, IRIS Distribution. IRIS is the leading digital distribution company dedicated to the successful marketing and promotion of over 450 prominent independent music and video catalogs.

YouSendIt provides the file transfer and document management services that allow small and medium businesses to execute on business processes across company boundaries. The subscription business services include YouSendIt Plus, YouSendIt Business and YouSendIt Business Plus. A pay-per-use service is also available as well as a free service.
